

ICSE Class 7 Mathematics:

Comprehensive Practice Set

This practice set is curated based on the curriculum standards found in ML Aggarwal, RS Aggarwal, and RD Sharma. It covers foundational topics in Number Systems and Integers.

Student Name:  Person

Date:  Date

School:  Place

Chapter 1: Number Systems (Indian & International)

Easy

1. Write the numeral for "Nine crore five lakh four thousand one" using the Indian system of numeration.
2. Insert commas according to the International system and write the name for: 78921092.
3. Find the difference between the place value and face value of 7 in the number 4,57,12,031.

Intermediate

4. How many 6-digit numbers are there in total in the Indian system?
5. Rewrite the number 50,403,211 (International) in the Indian system and write its name.
6. Find the sum of the greatest 5-digit number and the smallest 6-digit number.

Tough

7. A person has ₹1,00,00,000. He buys a house for ₹62,45,000 and a car for ₹12,35,500. How much money is left with him? Express the answer in words in both systems.

8. What is the difference between the largest 7-digit number having three different digits and the smallest 7-digit number having four different digits?

Chapter 2: Natural Numbers and Whole Numbers

Easy

9. Write the successor and predecessor of the smallest 4-digit number.
10. Is every natural number a whole number? Is every whole number a natural number? Explain.
11. State the property used: $25 \times (10 + 2) = (25 \times 10) + (25 \times 2)$.

Intermediate

12. Find the product using suitable properties: 738×103 .
13. Find the value of $(54279 \times 92) + (8 \times 54279)$ using the distributive property.
14. Divide 4501 by 15 and verify the relation: $\text{Dividend} = (\text{Divisor} \times \text{Quotient}) + \text{Remainder}$.

Tough

15. Find the largest 5-digit number which is exactly divisible by 47.
16. A vendor supplies 32 liters of milk to a hotel in the morning and 68 liters of milk in the evening. If the milk costs ₹45 per liter, how much money is due to the vendor per day? (Use properties to solve).

Chapter 3: Negative Numbers and Integers

Easy

17. Evaluate: $(-20) + (-15) - (-35)$.
18. Compare using $<$, $>$ or $=$: $|-15| + |4|$ ____ $|-15 + 4|$.

Intermediate

20. The temperature of a city at 6:00 AM was -4°C . By noon, it rose by 10°C and then fell by 3°C by 10:00 PM. What was the temperature at 10:00 PM?

21. Find the product: $(-1) \times (-2) \times (-3) \times (-4) \times (-5)$.
22. Subtract the sum of -1050 and 813 from -23.

Tough

23. In a class test containing 15 questions, 4 marks are given for every correct answer and (-2) marks are given for every incorrect answer. Gurpreet attempts all questions but only 9 of her answers are correct. What is her total score?
24. Evaluate using distributive property: $(-48) \times 26 + (-48) \times (-36)$.
25. Simplify: $120 - [20 + \{15 - (8 - 5)\}]$.
